

**RFQ PRDE(ER)-2022-001
Addendum No. 02
Architectural and Engineering Services**

April 8, 2022

On March 9, 2022, PRDE issued Request For Qualifications No. PRDE(ER)-2022-001 (the “RFQ”) in order to obtain proposals from consultants to render architectural, engineering, and other professional services related to the reconstruction and rehabilitation of public school facilities.

On March 31, 2022, PRDE issued Addendum No. 01 to the RFQ, which answered questions posed by proponents and extended the deadline to file Statements of Qualifications until April 13, 2022.

Per this Addendum No. 02, PRDE wishes to clarify the nature of the professional services proposals (or “Statements of Qualifications” or “SOQ”) it is requesting through what was labeled in the RFQ as a “Design Consortium”. A Design Consortium, as defined by PRDE for purposes of the RFQ, is a team of professionals (several individuals and/or professional services corporations organized to render professional services), who can each provide individually, but in coordination with each other, such particular professional services as may be required by PRDE. PRDE’s preference is for the presentation of SOQ’s that include teaming arrangements to provide services in all the professional categories described in the RFQ. The SOQs and the relationship between the team members of any Design Consortium must comply, where applicable, with all of the requirements of Act 173-1988, as amended.

As indicated in the RFQ, PRDE will enter into professional services agreements with the chosen qualified individuals and/or professional services corporations, or otherwise, in compliance with the requirements of Act 173-1988.

This addendum also extends the due date to submit references until April 13th, 2022.
